

Recyclable  
Protective Packaging

Protecting your brand, your reputation and your products.

## Recyclable engineered packaging solutions from OPCO help you deliver pristine products - every time.

How great would your product damage and warranty claims look if your packaging supplier was interested in collaborating with you at the start of your product development cycle?

Did you know...OPCO, Inc. has been helping companies, for decades, avoid the rather environmentally un-friendly event of a product becoming damaged or destroyed during shipping or storage?

When you collaborate with OPCO, Inc. to develop protective packaging at the beginning of your product development cycle, your more likely to reduce product damage and warranty claims associated with seen and unseen damage during transit and while in storage.

EXPERIENCE

+

PROCESS

**PROCESSES TO GET  
IT DONE RIGHT**

OUR BUSINESS PROCESSES ENABLE US TO  
EXCEED *your* EXPECTATIONS

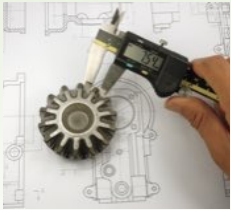

=

**OPCO helps you protect your brand,  
your reputation and your products.**

**Accurate and consistent dimensions,  
outstanding impact protection and a  
superior sustainability story.**

## DIMENSIONALLY ACCURATE

OPCORE is dimensionally accurate to 1/32 of an inch in thickness and 1/16 of an inch on dimensions between 4" and 96". While this means your product will fit perfectly in every package, the real advantage to you is impact protection is maximized...every time and all the time.

## IMPACT RESISTANT

OPCORE packaging is designed in collaboration with you: to protect, insulate and cushion products while stored or when shipped. Designs are prototyped and tested to meet your performance requirements. Protection is proven when it matters...before you ship your first product..

## RECYCLABLE

OPCO, Inc. has recycled millions of pounds of material and continues to be a leader in the industry. But that's just part of the story. OPCORE manufacturing processes are designed to utilize recycle content, if specified. Most importantly, OPCORE is completely recyclable as #6 plastic, right out of the box.

## THE OPCO GUARANTEE

For more than 28 years, OPCO's success has been built on robust business processes. Our team takes pride in everything we do - from rapid delivery of prototype designs to the manufacture of the highest quality protective packaging solutions. We know we protect what values to you.

So...what's the real story?

What makes OPCORE so special?

OPCORE is more than the material it's made from.

- ✓ OPCORE is made differently. The processes used to manufacture OPCORE enable the material to meet stringent performance requirements. As a result, OPCORE quality is certified by 3rd party independent labs.
- ✓ OPCORE Recyclable Protective Packaging solutions can provide a total reduction in carbon emissions vs alternative packaging materials. <sup>(1)</sup>

And, it enables more than a well-designed protective packaging solution.

- ✓ OPCORE packaging solutions are designed differently. Each design starts with your impact performance requirements. This means impact protection for your product has a higher value to OPCO than internal manufacturing efficiencies.
- ✓ OPCORE packaging solutions are manufactured differently. Opco employs unique manufacturing technologies to remove barriers that limit impact performance of typical packaging solutions.
- ✓ OPCORE packaging solutions are design-optimized to enable sustainable practices and to protect your product. OPCO manages the relationship between foam density, part design and impact performance to maximize sustainability and product protection. OPCORE is lightweight and always resilient.

But what makes OPCORE really special? It's made by a company which knows OPCORE is protecting the crown jewels of your company: your brand, your reputation and your product.

## Discover the Opco, Inc. difference.
